

HYDROLOGICAL SCIENCE AND TECHNOLOGY

Volume 19 Number 1-4

	<i>page</i>
Plenary Session	
A New Apocalypse: Floods, Droughts, and Turmoil of the 21st Century <i>William Hooke</i>	3
Western Water Law and the ESA: Managing Unnatural Hydrologic Extremes <i>Martha Pagel</i>	15
A Perspective on Perspectives: Fluctuation and Change in Climate Extremes <i>Abstract by Kelly Redmond</i>	25
Drought Risk Management and Policy Trends in the United States <i>Donald Wilhite</i>	27
Regional Growth Management & Urban Floodplain and Hydrology Management: Making the Land Use Connection <i>Mike Houck</i>	33
Climate Change	
Assessing Hydrologic Impacts of Climate Change at a Watershed Scale <i>Abstract by Heejun Chang</i>	37
Modeling Streamflows in Present and Future Climates -- Examples from Rainfall/Snowmelt Streams in Coastal British Columbia <i>Paul Whitfield, Alex Cannon, Jon Wang, and Christopher Reynolds</i>	41
New Mexico Climate and Hydrology: Is the Historic Record Valid for Predictive Modeling? <i>Karen Lewis and Deborah Hathaway</i>	57
Water Quality	
Relation Between Climate Variability and Stream Water Quality in the Continental United States <i>Aldo Vecchia</i>	77
Understanding How Extremes Influence Water Quality: Experience from Forest Watersheds <i>George Ice and Stephen Schoenholtz</i>	99
Ground Water	
Hydrogeologic and Isotopic Study of the Groundwater Resources of the Hueco Bolson Aquifer El Paso, Texas/Juárez, Mexico Area <i>Barry Hibbs, Fred Phillips, James Hogan, Chris Eastoe, John Hawley, Alfredo Granados, and Bill Hutchison</i>	109
Water Temperature	
Mapping Stream Temperature Patterns in the Mad River in Central Washington <i>Russell Faux and Philip Archibald</i>	123
Year-to-Year Variation in Stream Temperature and Implications for Water Quality Criteria <i>Don Essig</i>	135
Improvements in Stream Temperature Assessment <i>Matthew Boyd and Brian Kasper</i>	149

Water Temperature (cont.)

Evaluation of Water Temperature Regimes in the Snake River using Transect Measurements and the RBM10 Model

Ben Cope.....171

The Bull Run River-Reservoir System Model

Robert Annear and Scott Wells.....187

A Statistical Model for Estimating Stream Temperatures in Central Idaho

Mary Donato203

Modeling Uncertainty: Quicksand for Water Temperature Modeling

John Bartholow221

Riparian Processes

Modeling Hydrologic and Biogeochemical Functions of Riparian Zones: Questions, Challenges, and Future Directions

Shreeram Inamdar.....235

Montane Wetland Hydrochemistry: Uinta Mountains, Utah

Marek Matyjasik, Richard L. Ford, and Nancy Keate.....251

Floods

Seasonal Mechanisms of Peak Flows and Flood Frequency at ReynoldsCreek, Idaho

Tracie Kirkham and Marvin Pyles267

Detection of Flood Disturbance and Relaxation in the Lower Umatilla River, Oregon

Michael Hughes277

Fluvial Indicators of Hyperconcentrated Flows - With Application to the Floods on Mars

Josh Wyrick.....287

Droughts

The U.S. Drought Monitor: An Integrated Approach to Drought Early Warning

Don Wilhite.....299

National Drought Policy, Regional and Local Implementation

Ane Deister307

Development of a Drought Mitigation plan for Tampa Bay, Florida

Alison Adams, Wendy Nero, and Sanjay Puranik313

Water Supply Forecasting in the Upper Klamath Lake Basin during the 2001 Drought

Jolyne Lea.....327

Forest and Watershed Conditions

Water Sediment Transport and Soil Disturbance after Postfire Logging

James McIver.....335

Lessons Learned about Watershed Assessments

George Ice and Mary Ann Reiter349

Discriminating between Landslide Sites and Adjacent Terrain using Topographic Variables

Jeremy Appt, Arne Skaugset, Marvin Pyles, and Michael Wing363

Mitigation and Modeling

Artificial Neural Networks for Predicting Flood Stages in Urban Streams
Jun Han, Jy Wu, and Mark Senior375

**Channel Modifications and Ecosystem Restoration in the Columbia Slough,
Portland, Oregon**
David Crawford387

GIS Supported Hydrology in a Small, Forested Karst Watershed
Warren Campbell, Matthew Lumsdon, Sean Davies, and Billy Smith.....393

Paper not presented at the 2002 AIH Annual Meeting:

Criteria for Evaluating Watershed Models
Craig Loehle and George Ice.....403
